

February 2019

DCTA to Increase Transit Options with Mobility as a Service Request for Proposal

We have officially released a request for proposal (RFP) for Mobility as a Service (MaaS) and are soliciting proposals from firms or contractor teams to provide innovative mobility services for our member cities, contracted communities, partner organizations, as well as large employment centers and other areas as the need arises.

MaaS is a trending business model in the transit industry that utilizes on-demand, real-time platform-based services that can include any combination of various transport methods such as car and bike sharing, taxis and car rentals/leases, and provides a seamless customer experience for consumer, from travel planning to payments.

Firms selected by DCTA will be contracted to provide service proposals for flexible, efficient, and effective mobility services. These services will enhance and supplement DCTA's existing transit offerings and provide multimodal service to areas where traditional transportation options are less effective.
